

Annual Report 2021 -2022

Canada

Our long time National Director Bruce LeGrow decided to retire from the responsibilities of Canadian Masters after his eight plus years of successful leadership for the National Association. Bruce's legacy will be remembered for his great sense of humor and his work to increase the financial integrity of our Association. Bruce also devoted his time to our World Masters Association for his work to update practical legal language for the future World Master's events. The good news is Bruce will continue to serve our Canadian Masters as the Director for the Newfoundland and Labrador region as well as continue to compete in World Masters events Bruce will be in Seefeld with our team so say hello and pass along your thanks for all his work to keep Masters skiing alive and well throughout the World.

The Canadian Masters saw over four hundred and fifty new and returning members join our association with most traveling to Canmore, Alberta for the Masters World Cup last March 2022. What a great event for all who made the trip. The Canmore Organizing Committee did an incredible job navigating all the challenges of a World wide pandemic. Their comprehensive final event report will be included for all the International Directors and future Organizing committees to read. A great job of including the economic impact of hosting a Masters World Cup event!

We are slowly adding more competitions again across Canada for 2023 all cumulating with over one hundred plus Canadians planning to race next March in Seefeld, Austria.

Hoping we all can see less pandemic panic in coming months and wishing for peace for our Ukrainian and Russian members.

Michael Bell
National Director
