

2017/18 Annual Report — Spain

The team from Spain in Minneapolis was very small, probably due to the data in which the championships were developed. Unfortunately, they will not go down in history as the best for us.

The season in Spain was one of the best for the quantity and quality of snow in the mountains, they were able to make all the local and national competitions without problems.

To finish I have to announce that on January 1 we left our friend Joan Sallent (known to many of you), who was the National Director of Spain for more than 25 years.

The prospects for the next championships in Beitostolen will be better.

Anton Auladell
greetings to everyone
